THE MUTEK EXPERIENCE COMES TO LIFE AGAIN IN THE QUARTIER DES SPECTACLES

Montreal, May 11 2011 – With summer knocking on our door, we can announce an electronic kickoff to the month of June in the Quartier des spectacles! We're inviting MUTEK festival-goers – visitors and Montrealers alike – to fill our various public spaces between June 1 and 5.

“In 2010, the Conseil des arts de Montréal highlighted the status of MUTEK by awarding it the 25th Grand Prix, an honour shared with the Elektra festival. This confirms the prominent role played by MUTEK in spreading Montreal's reputation as the capital of digital art in North America. MUTEK's presence in the Quartier des spectacles is a perfect match with our desire to develop projects that highlight new fields of Montreal creativity, such as electronic music and digital arts. MUTEK events enliven the different public spaces, completing the urban landscape while letting spectators discover the city and make it their own” said Pierre Fortin, Quartier des spectacles Partnership General Director.

For the 12th edition of the festival, MUTEK is taking the Quartier des spectacles by storm, presenting a series of digital art projections that will serve as extensions to the existing Luminous Pathway. The projections will be visible on the facades of the ZERO 1 hotel from place de la Paix, the Hôtel Gouverneur Place Dupuis from place Émilie-Gamelin, and on the UQAM Centre de Design. MUTEK will also present activities in the Place de la Paix for the duration of the festival.
